I. INTRODUCTION

This report represents the findings of the twenty-fourth national compensation survey conducted by the National Society of Professional Engineers. The twenty-three previous surveys have covered the years 1952, 1954, 1956, 1958, 1960, 1962, 1964, 1967, 1969, 1971, 1973, 1975, 1977, 1979, 1981, and annually thereafter. These surveys have proved to be of considerable value to engineering firms, industrial organizations, national engineering organizations, local and state governmental agencies, and the departments of the Federal Government, as well as the United States Congress. The National Society of Professional Engineers sincerely hopes that this report will be equally useful.

Survey respondents were asked to report their annual base salary from their primary employer as of January 1, 1990, plus additional cash income from that employer (excluding overtime pay) for the preceding calendar year. Income from secondary and/or part-time employment was excluded.

Survey respondents were all members of the National Society of Professional Engineers, an organization of individual professional engineers. The Society, containing 54 member state and territorial societies and over 535 local chapters, was organized in 1934 to advance the public interest and promote the professional, social, and economic interests of the professional engineer.

The National Society of Professional Engineers acknowledges with grateful thanks the cooperation of the members of the Society in responding to the questionnaire. Dr. Steven Langer, President of Abbott, Langer & Associates, Chicago-based consultants in personnel management and industrial psychology, designed the survey questionnaire, directed the computer analysis of the data, and prepared the final report.

The survey was conducted under the supervision of the NSPE Professional Employment Committee, chaired by Susanne Leckband, P.E.

II. DEFINITIONS

Income, as defined for this report, constitutes the individual's *annual base salary* from his or her *primary* employer as of January 1, 1990, *plus additional cash income* from the individual's primary job (including fees, bonuses, and commissions, but excluding overtime pay and income from secondary or part-time employment) during the preceding 12-month period.

In each table, the words "number responding" refer to the usable number of responses from which the statistics were derived for the data line in which that specific number appears.

The term "mean" indicates that the annual compensation of all individuals in a group were added together and the total divided by the number of individuals involved. This measure of central tendency can be unduly influenced by a few very high or very low data. While the mean permits certain statistical calculations, greater consideration should be given to the median for comparison purposes, especially when the sample size is small.

The "median" is the value of the middle item (or the average of the two middle items) of a group of values when they are arrayed from largest to smallest. The advantage of the median is that it provides a measure of central tendency that is not unduly influenced by a few very high or very low data (e.g., atypical annual incomes).

"Quartiles" and "deciles" are measures of dispersion. When all of the incomes are arrayed from the highest to the lowest, the first quartile is that income below which 25% of the incomes fall. Likewise, the third quartile is the figure below which 75% of the incomes fall. Ten percent of the incomes fall below the first decile; 90% below the ninth decile.

All other items are defined in the cover letter and Instruction Book, which appear in Appendix A.

III. METHODOLOGY

The 1990 questionnaire (reproduced in Appendix A) was mailed to 58,558 members of the National Society of Professional Engineers in January 1990. The total number of questionnaires returned by March 20th was 13,933, a 23.8% response rate. This rate of response compares favorably with the 21.7% response rate in 1989, the 23.0% in 1988, the 24.7% in 1987, and the 25.0% in 1986.

All data were eliminated from the survey if the respondent was on active duty in the Armed Forces, a full-time student, retired, or unemployed at the time of the survey.

In some cases, pay data were not provided, were insufficient, or were obviously erroneous, or the respondent had been unemployed for some part of 1989. These responses (plus those of respondents on active duty in the Armed Forces, full-time students, retirees, and those unemployed at the time of the survey) were eliminated in calculating income statistics. This reduced the sample to 12,486 for this purpose.

For the exhibits on changes in base pay, overtime practices, and 401(k) plans in the engineering field, self-employed individuals (and respondents on active duty in the Armed Forces, full-time students, retirees, and those unemployed at the time of the survey) were eliminated. Therefore, 10,288 responses were usable for these tables.

Not every participant provided all of the information requested. Questionnaires were included in the study if they provided sufficient information to be included in at least one table of this report.

Anomalies may occur in the income statistics reported for a few of the smaller sub-groups if one or more survey participants reported incomes considerably different from the usual income of individuals with a common demographic characteristic. Regretfully, it is not possible to identify and delete all such responses from the survey. Fortunately, these cases have no appreciable effect upon the medians or quartiles reported for major sub-groups.

Data for sub-groups of extremely small size lack statistical validity. However, such data can provide a guideline if the data are consistent with related information.

Since the sample size for matching sub-groups is too small to provide statistical validity, no attempt was made to prepare statistics and make comparisons by origin of respondent.

To provide maximum data in the space allocated, the computer program was written to eliminate any line of data for which the sample size was less than five. Further, the computer program was written to replace the first and ninth deciles with dashes whenever the statistics in a line of data were based on information from fewer than 20 respondents and to replace the first and third quartiles with dashes whenever the statistics in a line of data were based on information from fewer than 10 respondents.

IV. INTERPRETING THE DATA

Despite the fact that participation was good, both in number of participants and percentage of participants, it is recommended that data for all pertinent variables be considered simultaneously when the data are interpreted - especially where the sample size of a sub-group is extremely small.

Some respondents may have reported incomes considerably higher or lower than those of the remaining individuals in a sub-group. This would unduly influence the mean for some small sub-groups. Therefore, whenever the sample is small and there is a considerable difference between the mean and median in a line of data, greater weight should usually be given to the median than to the mean.

Sometimes, the information reported in a line of data may appear to be inconsistent with that of related data lines. In such cases, the relative sample size of each data line should be considered. Usually, more confidence should be placed in the data line having the larger sample size. However, the "rule of reason" should govern.

As the definitions imply, one-half of the respondents are paid more than the median, one-quarter more than the third quartile, and 10% more than the ninth decile. Naturally, length of service and individual capability play a large part in determining an individual's specific income level. Further, as a matter of policy, many employers deliberately set pay rates above the average to attract and retain the best possible employees. Therefore, the fact that an individual's salary is above some otherwise-appropriate statistic need not be a matter of concern.

V. COMPENSATION

Income

As of January 1, 1990, the median total annual income of participants in the 1990 NSPE survey was $55,500 (including salaries, fees, cash bonuses, and commissions received from the respondents' primary jobs during the preceding 12-month period - but specifically excluding overtime pay). This represents an increase of 4.7% in the 12-month period since the preceding survey. However, during this same period, the Consumer Price Index rose by 5.2%.

Individual incomes vary widely. As Exhibit 1 shows, 10% of respondents earn under $35,794, while 10% earn $101,680 or more.

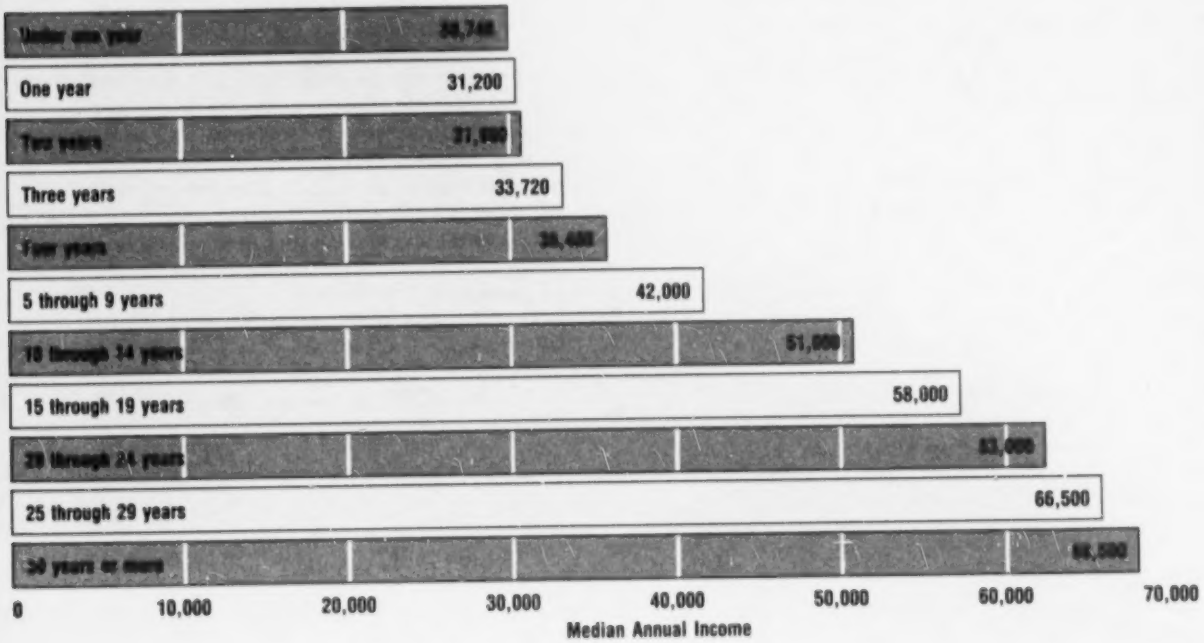
EXHIBIT 2. Income by Length of Experience



Length of Experience

Median income shows a consistent increase with increased engineering experience. As Exhibit 2 reports, the median income of respondents increases regularly from $30,740 for those with under one year of experience (up .6%) to $68,500 for those with 30 years of experience or more (up 5.4%). This is a 122.8% "spread," as compared to the 123.8% spread found in the 1989 survey, the 110.1% found in 1988, the 122.2% in 1987, the 110.8% in 1986, the 111.7% in 1985, the 100.0% in 1984, the 94.2% in 1983, and 87.3% in 1982. It represents an average increase of about 4.1% per year of experience. This is consistent with findings in this survey series and other engineering studies.

Earnings differences increase with the number of years of experience and are greatest in the most experienced groups. The inter-quartile range (the difference between the first and third quartiles) is the best measure of the income range. It increased from $6,300 (23.2%) for those with under one year of experience to $16,000 (36.4%) for those with 10 - 14 years of experience, $28,000 (53.8%) with 20 - 24 years of experience, and $37,061 (67.5%) with 30 years of experience or more.

The earnings of the lowest-paid group (i.e., the first decile) showed relatively little change regardless of additional experience over 15 years. (This finding is consistent with most previous surveys in this series.) On the other hand, added years of experience among the highest-paid (i.e., the ninth decile) resulted in increased annual earnings of $42,322 (43.8%) from 15 - 19 years of experience to 30 years of experience or more.

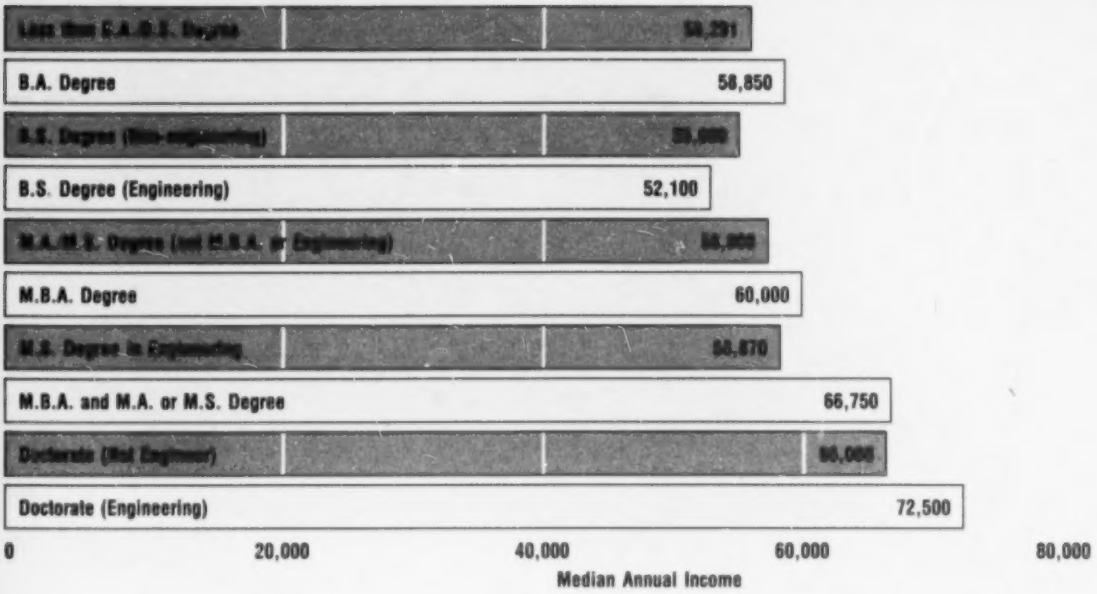
EXHIBIT 3. Income by Level of Education



Level of Education

Exhibit 3 shows graphically median income by level of education attained. As is obvious, increased education in the engineering field results in higher earnings. Respondents holding doctoral degrees in engineering have a median income of $72,500 (up 6.6%). Those with the M.S. in engineering earn a median of $58,870 (up 4.8%). Finally, those with the B.S. in engineering earn $52,100 (up 4.2%).

Those holding the doctorate in engineering earn 39.2% more than those with a B.S. in engineering. The comparable figures in previous years were 36.0% in 1989, 35.4 in 1988, 31.0% in 1987, 30.1% in 1986, 25.5% in 1985, 24.5% in 1984, 24.9% in 1983, and 21.0% in 1982.

NSPE members holding the M.B.A. degree or the M.S. in engineering have higher median incomes than those holding other masters degrees. On the other hand, the B.A. and the B.S. outside of engineering results in higher earnings than does the B.S. in engineering. However, a higher percentage of these respondents are in executive/administrative jobs, an area that pays better than straight engineering.

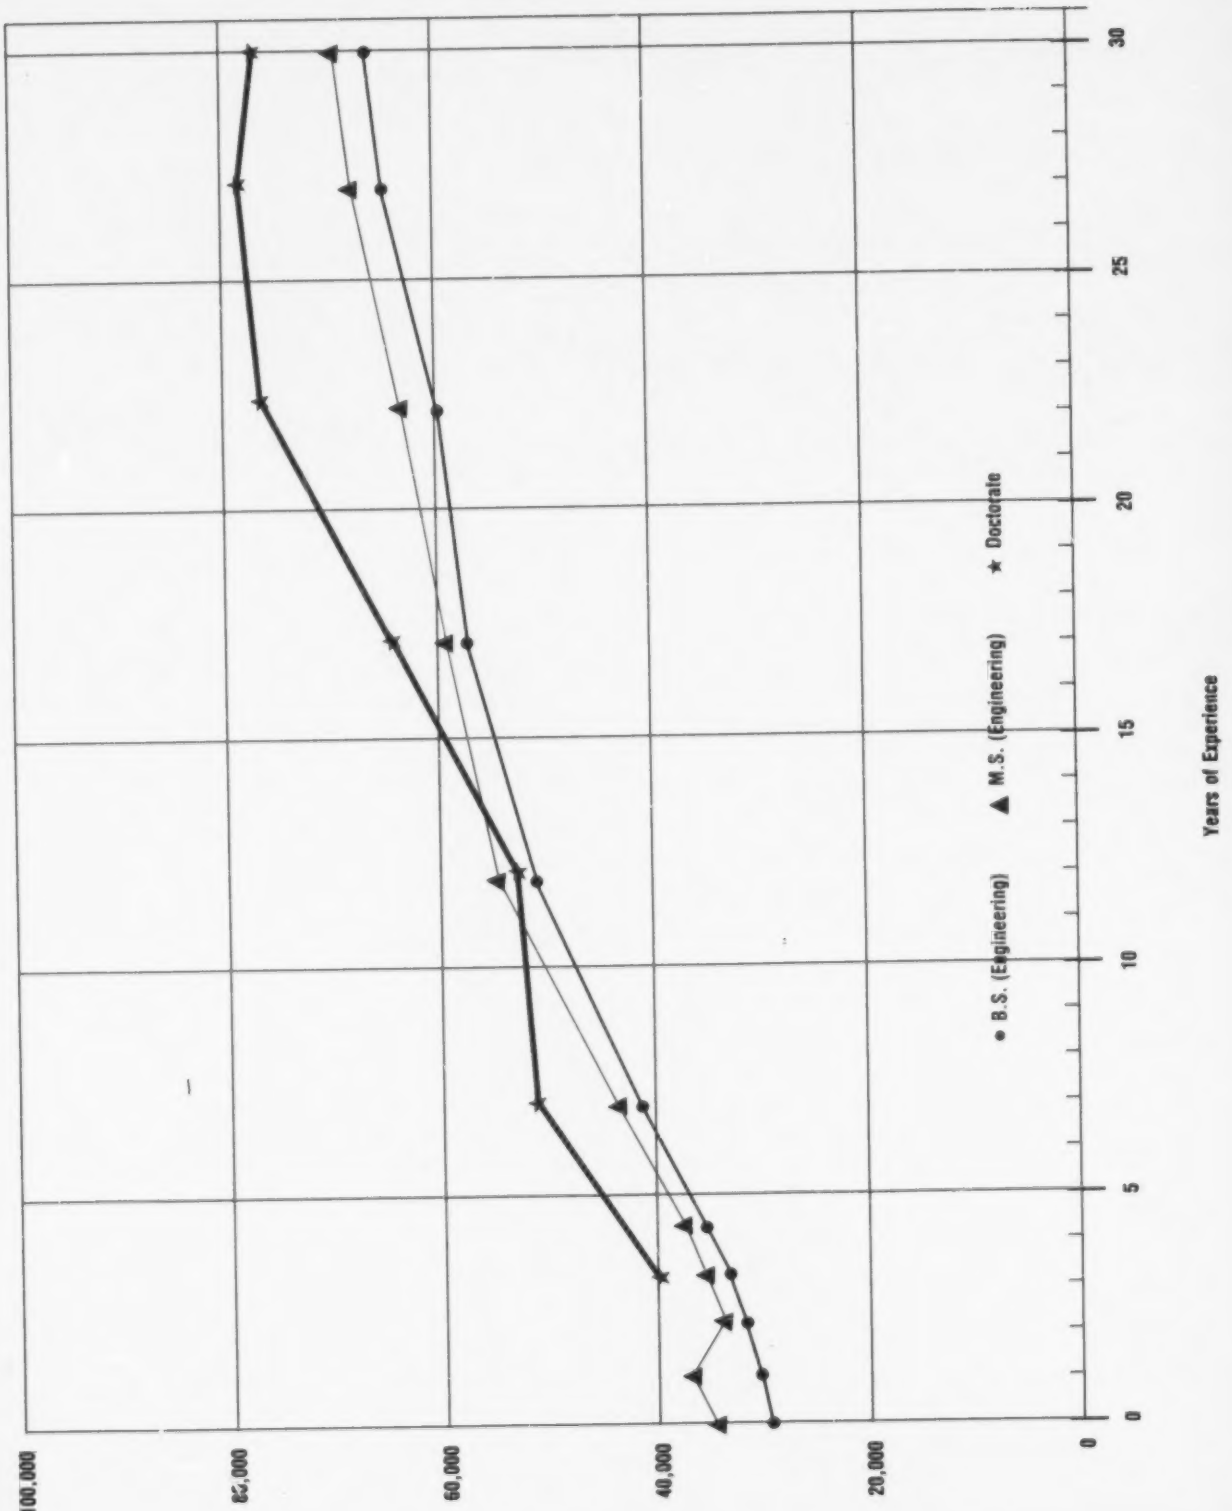
EXHIBIT 4. Income by Length of Experience and Highest Degree Earned



Length of Experience and Highest Degree Earned

Income by engineering experience vs. level of education for three of the largest groups by degree held appears graphically and in tabular form in Exhibit 4. It also appears in tabular form in Appendix B for all degrees investigated.

The curves by median income for the B.S., M.S., and Ph.D. in engineering are fairly smooth and follow the expected relationship.

Between five through nine years of experience (below which there are insufficient data for doctoral degrees for realistic analysis) and 30 years of experience or more, the "spreads" of median income for the B.S., M.S., and Ph.D. in engineering are 60.2%, 65.8%, and 51.6%, respectively.

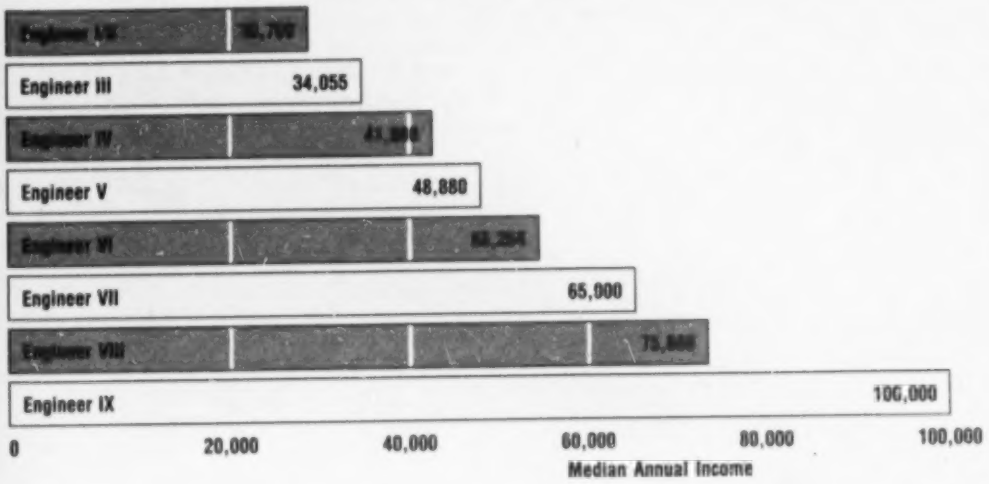
EXHIBIT 5. Income by Level of Professional Responsibility



Level of Professional Responsibility

Of all survey participants, 94.1% were able to match their level of professional responsibility to one of the engineering grades defined in the Instruction Book (see Appendix A). The remaining 5.9% of the respondents did not respond or indicated that their position encompassed or fell between two levels or that their level of professional responsibility was not adequately described.

Naturally, NSPE members fall primarily into the higher grades (Engineer IV through VIII). The median member falls into the grade of Engineer VI. (It should be noted that respondents' "self-grading" may not always be accurate, despite the detailed guidelines furnished in this and previous surveys.)

Exhibit 5 reports income by engineering grade. The graph follows the shape expected, rising from a median of $30,700 for Engineer I/II to $100,000 for Engineer IX. This is a 225.7% "spread," greater than the 220.2%, 208.5%, 200.0%, 182.2%, 174.5%, 162.0%, and 160.2% "spreads" found in 1989, 1988, 1987, 1986, 1985, 1984, and 1983, respectively. (A more extensive exhibit reporting income by engineering grade vs. length of experience appears in Appendix B.)

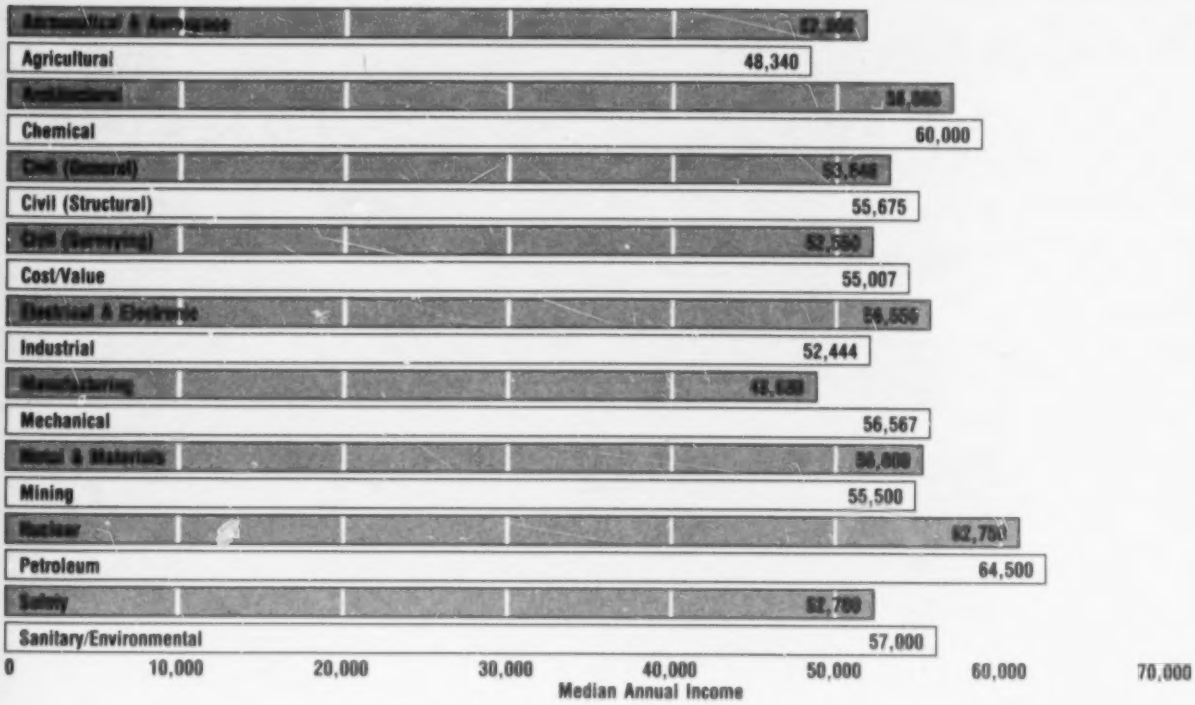
EXHIBIT 6. Income by Major Branch of Engineering



Major Branch of Engineering

The highest median income by major branch of engineering goes to those respondents working in petroleum engineering ($64,500). This group is followed by those in nuclear engineering ($62,750), chemical engineering ($60,000), architectural engineering ($58,000), sanitary/environmental/pollution control engineering ($57,000), and electrical & electronics, mechanical and metallurgical & materials engineering (all in the $56,000 - $56,567 range).

At the other end of the income spectrum are those employed in agricultural engineering ($48,340). They are preceded by those in manufacturing engineering ($48,680), and in aeronautical & aerospace, civil (primarily surveying), industrial, and safety engineering (all between $52,000 and $52,700). The remaining major branches of engineering surveyed have median incomes ranging from $53,646 to $55,675.

Exhibit 6 reports income statistics both graphically and in tabular form. (A more extensive exhibit reporting income by major branch of engineering vs. length of experience appears in Appendix B.)

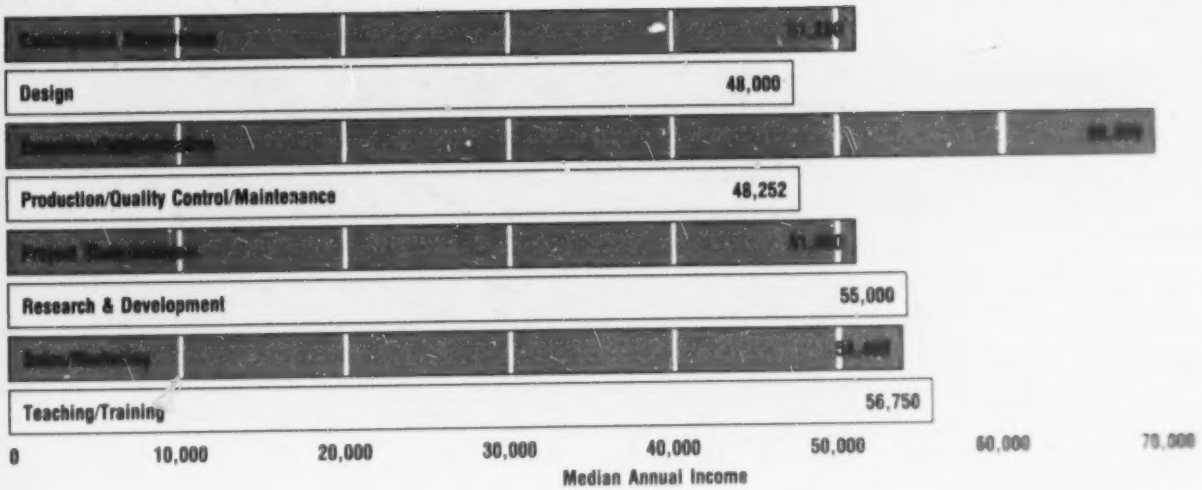
EXHIBIT 7. Income by Job Function



Job Function

As in the past, median annual income is highest for respondents in executive/administrative job functions ($69,800). This group is followed by those in teaching/training ($56,750), R&D ($55,000), and sales/marketing ($54,400).

The lowest median income is received by those in design ($48,000). This group is preceded by those in production/quality control/maintenance ($48,252), project study & analysis ($51,080), and construction supervision ($51,250).

A comparison of median incomes by job function appears in Exhibit 7. An expanded version of this exhibit (with "breakouts" of income by length of experience, metropolitan area, etc.) appears in Appendix B.

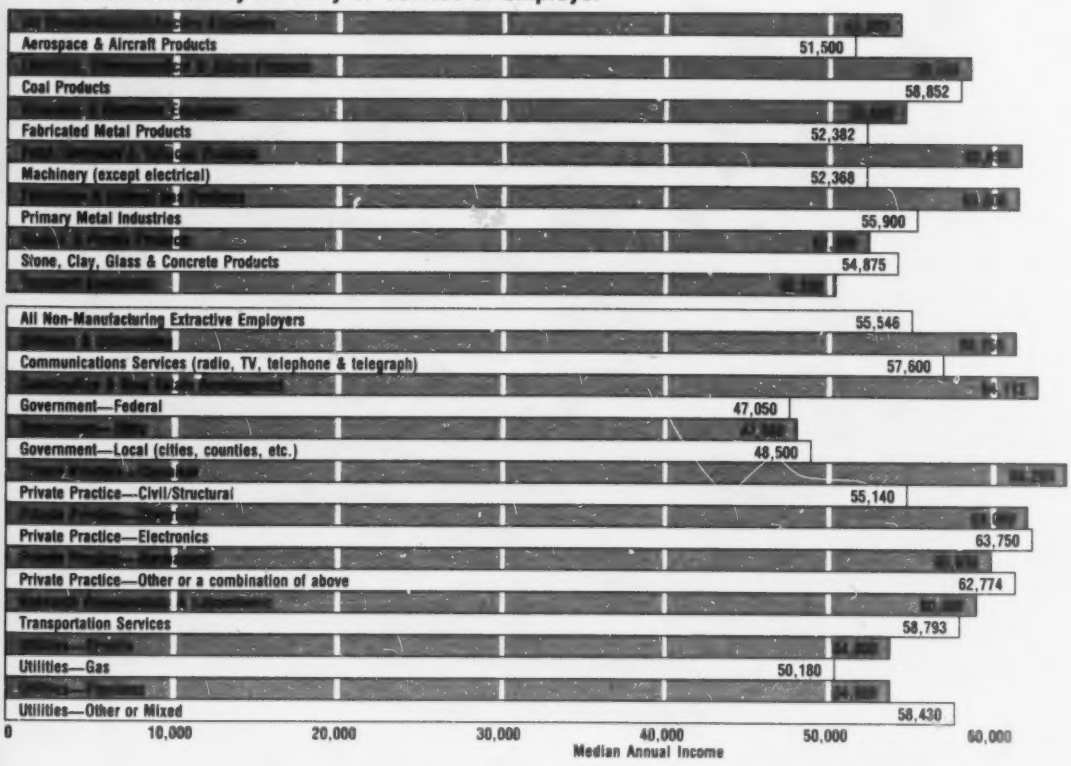
EXHIBIT 8. Income by Industry or Service of Employer



Industry or Service of Employer

Respondents employed in private practice (primarily chemical engineering), construction & real estate development, private practice firms (primarily in electronics engineering and in electrical engineering), fabricated metal manufacturing, petroleum & natural gas products have the highest median incomes of the 30 industry groups studied.

Those receiving the lowest median incomes are employed by federal, state, and local governments, utilities (gas), and manufacturers of transportation equipment and aerospace & aircraft products.

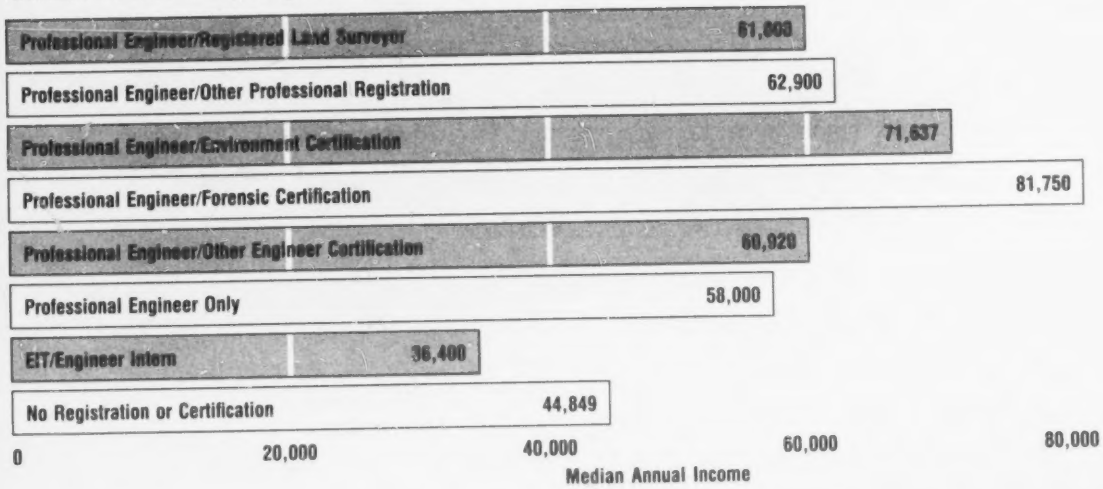
EXHIBIT 9. Income by Registration Status



Registration Status

Only 2.1% of respondents are not registered or certified. Naturally, the vast majority of respondents (85.6%) are P.E.'s (9.2% are both P.E.'s and Registered Land Surveyors, 1.7% hold both the P.E. and certification in environmental engineering, .5% the P.E. and certification in forensic engineering, 3.5% the P.E. and certification in some other engineering specialty, and 2.4% the P.E. and some other registration). The remaining participants are Engineers-in-Training/ Engineer Interns (who compose 12.3% of the sample) or did not provide this information.

Exhibit 9 reports income by registration-certification status. Those respondents who are P.E.'s certified in Forensic Engineering enjoy the highest median annual income ($81,750). P.E.'s who are also certified in Environmental Engineering ($71,637), are certified in some other engineering specialty ($60,920), have some other professional registration ($62,900), or are Registered Land Surveyors ($61,000) follow. P.E.'s without other licensure have a median income of $58,000. Unregistered-uncertified individuals have a median income of $44,849. Engineers-in-Training/Engineer Interns have the lowest median income ($36,400).

Extensive exhibits containing data on income by registration status vs. other demographic variables appear in Appendix B.

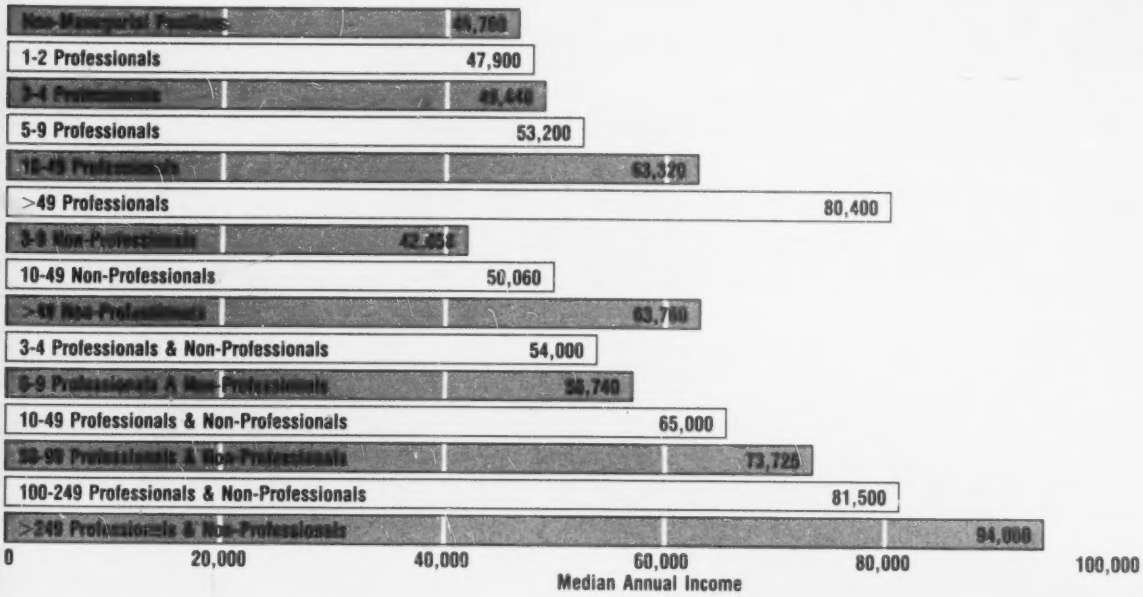
EXHIBIT 10. Income by Supervisory/Managerial Responsibility



Supervisory/Managerial Responsibility

Almost 78% of the respondents have supervisory or managerial responsibility. This demographic variable plays an important part in determining income.

Income increases regularly with increased supervisory/managerial responsibility. However, the median income of non-supervisory positions is slightly higher than that of positions with the lowest level of supervisory responsibility over non-professionals (which may, in part, represent foreman positions). Supervision of engineers & other professionals results in higher earnings than does supervision of sub-professional personnel, given the same number of subordinates.

P.E.'s in non-supervisory positions have a median income of $45,760 (up 4.9% in the past year), while the median income of those supervising/managing only engineers, scientists and/or technologists increases regularly from $47,900 (up 5.6%) for those who supervise one or two such professionals to $80,400 (down 1.3%) for those who direct the activities of 50-plus professionals.

Supervision of both professionals and non-professionals results in a median income of $54,000 with only three or four subordinates. Income increases regularly to $94,000 for the group that manages 250 or more such subordinates.

These data are displayed in Exhibit 10. Additional information on this variable appears in Appendix B.

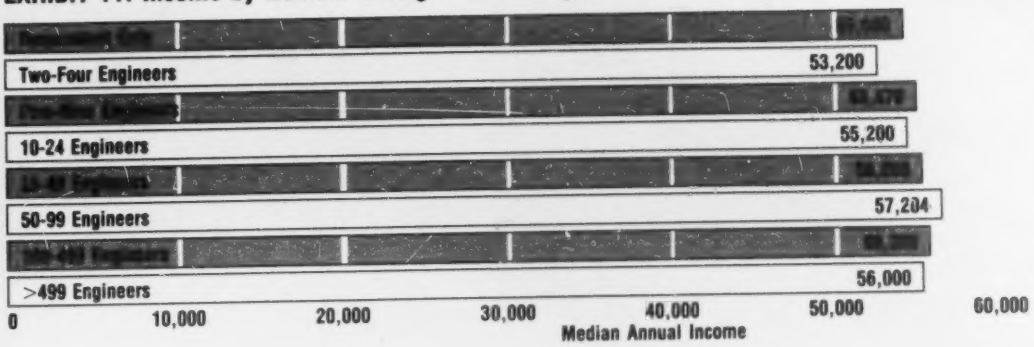
EXHIBIT 11. Income by Number of Engineers in Organization



Number of Engineers

As Exhibit 11 shows, the median income of respondents by the number of engineers in the organization increases regularly through the 50 - 99 engineers group. Thereafter, median income declines slightly. However, this factor has relatively little effect upon median income.

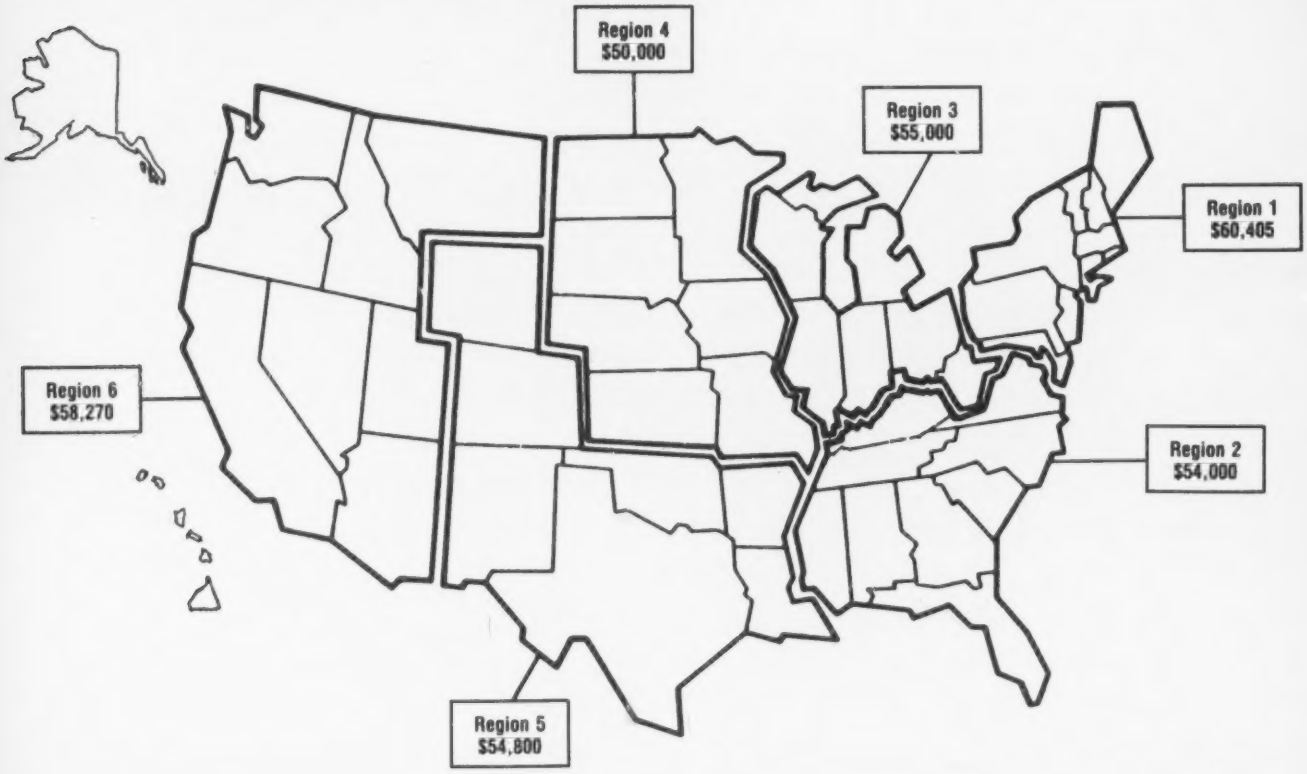
EXHIBIT 12. Income by Region (Metropolitan Areas Included)



Geographic Variations

Exhibit 12 reports income by geographic region (with regions including metropolitan areas surveyed). As the data indicate, the highest median income is in Region 1, the northeastern states ($60,405 - up 3.8%) and Region 6, the Pacific and western states ($58,270 - up 3.7%). The lowest median income is found in Region 4, primarily the Great Plains States ($50,000 - up 4.2%).

EXHIBIT 13. Income by Region (excluding metropolitan areas surveyed)

As Exhibit 13 shows, when median income data by region are analyzed *excluding* the metropolitan areas that were surveyed (listed in Exhibit 14), the relationship reported above does not change.

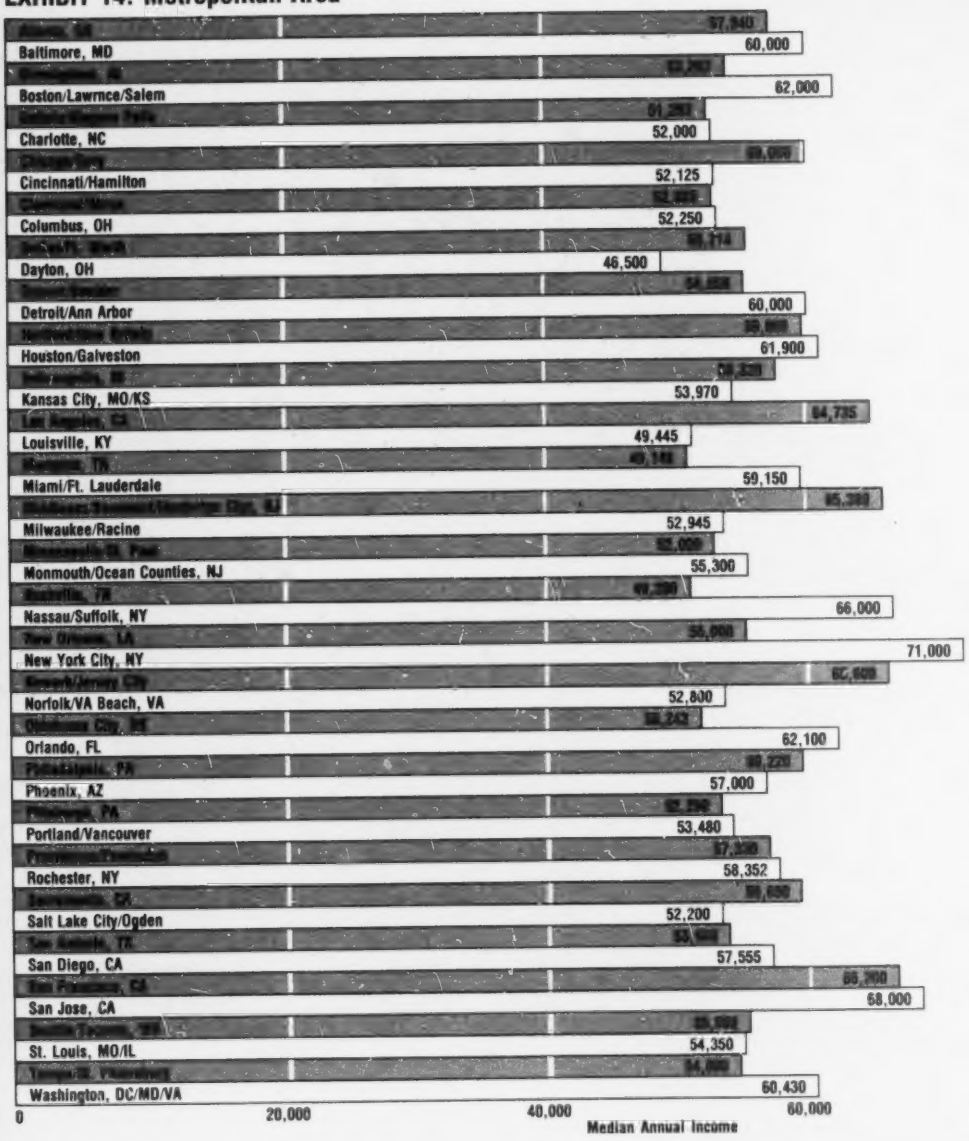
EXHIBIT 14. Metropolitan Area



The income data received were also analyzed by metropolitan area. The highest median income is found in New York City ($71,000). It is followed by San Jose (CA) & vicinity ($68,000), San Francisco/Oakland (CA) & vicinity ($66,200), Nassau/Suffolk Counties (NY) & vicinity ($66,000), Newark/Jersey City (NJ) & vicinity ($65,600), Middlesex/Somerset/Hunterdon Counties (NJ) & vicinity ($65,380), and Los Angeles/Anaheim/Long Beach/Riverside (CA) & vicinity ($64,735).

The lowest median incomes found in this study of 50 metropolitan areas are in Dayton/Springfield (OH) & vicinity ($46,500), Memphis (TN/AR/MS) & vicinity ($49,148), Nashville (TN) & vicinity ($49,200), Louisville (KY/IN) & vicinity ($49,445), Oklahoma City (OK) & vicinity ($50,243), and Buffalo/Niagara Falls (NY) & vicinity ($51,253).

The median incomes in the remaining metropolitan areas surveyed range from $52,000 to $62,100. Additional statistics on income by metropolitan area appear on the next page and in Appendix B.

VI. MISCELLANEOUS

Increase in Base Salary

As shown in Exhibit 15, 5.8% of respondents were promoted during 1989. An additional 4.0% changed employers during that year. Of the remaining responses to this question, 0.7% reported a decrease in base salary during 1989 and 9.6% reported no change in salary. The median increase for those who received a raise (without being promoted or changing employers) was 5.7%. The middle 50% of increases ranged from 4.1% to 7.9%.

Overtime Compensation

Over two-thirds (68.5%) of respondents reported that they did not receive direct compensation for overtime work. Of those who were compensated for overtime, almost two-thirds (65.2%) were paid straight time for overtime work or were given equal time off.

401(k) Practices

About 32% of respondents are not covered by an employer-provided 401(k) savings plan. Of the remainder, the median percentage of the employee's contribution matched by the employer is 50%. Where the employer's maximum contribution to the 401(k) plan is a fixed percentage of the employee's salary, the median maximum percentage of the employee's salary contributed by the employer is 4.9%. More definitive data appear in Exhibits 17 through 19.

APPENDIX A

NATIONAL SOCIETY OF PROFESSIONAL ENGINEERS

December 29, 1989

Dear NSPE Member:

Response to the 1989 NSPE Income & Salary Survey, the twenty-third in a series dating back to 1952, was excellent. This major survey, conducted among all NSPE members, has become a standard information source for everyone concerned with professional engineering salary scales. Because of its importance, we urge all Society members to participate.

As the enclosed questionnaire indicates, this survey will provide an intensive look at the compensation of professional engineers. The report will provide useful statistical information from a larger data base than any other survey in the engineering field.

An article summarizing the survey findings will be published in *Engineering Times*. If you want more detailed information than a news article can possibly provide, you can reserve your copy of the extensive, completely updated survey report today (at the substantial membership discount) by completing and returning the enclosed order form along with your check. (Participant orders received prior to April 1 will be filled at the further-reduced price of $30.00). All orders will be filled promptly upon publication of the report, scheduled for May 15, 1990.

Whether or not you wish to order a copy, please take a few minutes right now to complete and mail the Survey Reply Form. Thank you very much for your assistance. Please return the form no later than *March 1st*.

Sincerely yours,

Susanne Leckband, P.E.
Chairman, Professional
Employment Committee

A. ***Employment Status.*** As of January 1, 1990, what was your employment status? (Please select the ***one*** response below which ***best*** describes your status at that time and post the ***code number*** for it in the space provided under A ***on the Survey Reply Form***.)

- [1] Self-employed full-time (owner/principal).
- [2] Employed full-time (salaried employee).
- [3] On college/university faculty.
- [4] Full-time student.
- [5] On active duty in the Armed Forces.
- [6] Retired or working part-time.
- [7] Unemployed.
- [8] Other (***not*** adequately described above).

B. ***Unemployment Data.*** During the period from January 1, 1989 to January 1, 1990, how long were you unemployed? Post the ***code number*** under ***B*** on the Survey Reply Form.

- [1] ***Not*** unemployed (employed or self-employed all year/ retired/full-time student).
- [2] Employed all ***academic*** year.
- [3] Unemployed ***under*** one month.
- [4] Unemployed ***at least*** one month but ***less than*** three months.
- [5] Unemployed three months or more.

C. ***Base Salary from Primary Job.*** As of January 1, 1990, what was your ***annual base salary*** from your ***primary full-time*** job? (***Exclude*** fees, overtime pay, bonuses, and commissions. ***Also*** exclude income from ***secondary*** employment - such as part-time teaching, part-time consulting, etc.)

NOTE: If your base annual salary was ***less than*** $10,000 (e.g. $9,525), post it in the ***six*** boxes under C ***on the Survey Reply Form*** as follows:

0	0	9	5	2	5

If ***between*** $10,000 and $99,999 (e.g. $27,375), write it as follows:

0	2	7	3	7	5

If $100,000 or ***more*** (e.g., $137,925), write it as follows:

1	3	7	9	2	5

NOTE: If ***no*** base salary, fill in with zeros.

D. ***Other Cash Compensation from Primary Employment.*** During the period from January 1, 1989 to January 1, 1990, what ***additional cash income*** did you receive from your ***primary*** job? (***Include*** fees, bonuses and commissions but ***exclude*** salary, overtime pay and income from secondary or part-time employment.) **NOTE:** Use the same posting system as in C above. If "none," fill in with zeros.

E. ***Level of Professional Responsibility***. Under E on the Survey Reply Form, post the ***code number*** below which ***best*** describes your level of professional responsibility as of January 1, 1990.

[1] —. ***Not*** adequately described below.

[2] ENGINEER I/II (equivalent to GS 5 and GS 7). ***Typical Duties/Responsibilities***: Using prescribed methods, performs specific and limited portions of a broader assignment of an experienced engineer. Applies standard practices and techniques in specific situations, adjusts and correlates data, recognizes discrepancies in results, and follows operations through a series of related detailed steps or processes. ***Direction Received***: Supervisor screens assignments for unusual or difficult problems and selects techniques and procedures to be applied on non-routine work. Receives close supervision on new aspects of assignments. ***Supervisory Responsibility***: May be assisted by a few aides or technicians.

[3] ENGINEER III (equivalent to GS 9 or Academic Instructor). ***Typical Duties/Responsibilities:*** Performs work that involves conventional types of plans, investigations, surveys, structures, or equipment with relatively few complex features for which there are precedents. Assignments usually include one or more of the following: equipment design/development; materials testing; specifications preparation; process study; research investigations; report preparation; and other activities of limited scope requiring knowledge of principles/techniques commonly employed in the specific narrow area of assignments. ***Direction Received***: Receives instructions on specific assignment objectives, complex features, and possible solutions. Assistance is furnished on unusual problems; work is reviewed for application of sound professional judgment. ***Supervisory Responsibility***: May supervise or coordinate the work of draftsmen, technicians, and others who assist in specific assignments.

[4] ENGINEER IV (equivalent to GS 11 or Assistant Professor). ***Typical Duties/Responsibilities***: Plans, schedules, conducts, or coordinates detailed phases of the engineering work in a part of a major project or in a total project of moderate scope. Performs work that involves conventional engineering practice but may include a variety of complex features such as conflicting design requirements, unsuitability of conventional materials, and difficult coordination requirements. Work requires a broad knowledge of precedents in the specialty area and a good knowledge of principles and practices of related specialties. ***Direction Received***: Independently performs most assignments with instructions as to the general results expected. Receives technical guidance on unusual or complex problems and supervisory approval on proposed plans for projects. ***Supervisory Responsibility***: May supervise or coordinate the work of engineers, draftsmen, technicians, and others who assist in specific assignments.

[5] ENGINEER V (equivalent to GS 12 or Associate Professor). ***Typical Duties/Responsibilities***: One or more of the following: •In a ***supervisory capacity***, plans, develops, coordinates, and directs a large and important engineering project or a number of small projects with many complex features. A substantial portion of the work supervised is comparable to that described for Engineer IV. •As an ***individual researcher or worker***, carries out complex or novel assignments requiring the development of new or improved techniques and procedures. Work is expected to result in the development of new or refined equipment, materials, processes, projects, and/or scientific methods. •As a ***staff specialist***, develops and evaluates plans and criteria for a variety of projects and activities to be carried out by others. Assesses the feasibility and soundness of proposed engineering evaluation tests, products, or equipment when data are insufficient or confirmation by testing is advisable. Usually performs as a staff advisor and consultant as to a technical specialty, a type of facility or equipment, or a program function. ***Direction Received***: Supervision and guidance relate largely to overall objectives, critical issues, new concepts, and policy matters. Consults with supervisor concerning unusual problems and developments. ***Supervisory Responsibility***: Supervises, coordinates, and reviews the work of a small staff of engineers and technicians, estimates manpower needs and schedules and assigns work to meet completion date ***or***, as an ***individual researcher or staff specialist***, may be assisted on projects by other engineers or technicians.

[6] ENGINEER VI (equivalent to GS 13 or Professor). ***Typical Duties/Responsibilities***: One or more of the following: •In a ***supervisory capacity***, (a) plans, develops, coordinates, and directs a number of large and important segments of a project of major scope and importance, ***or*** (b) is responsible for the entire engineering program of an organization when the program is of limited complexity and scope. The extent of responsibilities generally requires a few (3 to 5) subordinate supervisors or team leaders with at least one in a position comparable to Level V. •As an ***individual researcher or worker***, conceives, plans, and conducts research in problem areas of considerable scope and complexity. The problems must be approached through a series of complete and conceptually-related studies, be difficult to define, require unconventional or novel approaches, and require sophisticated research techniques. Available guides and precedents contain critical gaps, are only partially related to the problem, or may be largely lacking due to the novel character of the project. At this level, the individual researcher generally will have contributed inventions, new designs, or techniques which are of material significance in the solution of important problems. •As a ***staff specialist***, serves as the technical specialist for the organization (division or company) in the application of advanced theories, concepts, principles, and processes for an assigned area of responsibility (i.e., subject matter, function, type of facility or equipment, or product). Keeps abreast of new scientific methods and developments affecting the organization; recommends changes in emphasis of programs or new programs warranted by such developments. ***Direction Received***: Supervision received is essentially administrative, with assignments given in terms of broad general objectives and limits. ***Supervisory Responsibility***: Plans, organizes, and supervises the work of a staff of engineers and technicians. Evaluates progress of the staff and results obtained, and recommends major changes to achieve overall objectives ***or***, as an ***individual researcher or staff specialist***, may be assisted on individual projects by other engineers or technicians.

[7] ENGINEER VII (equivalent to GS 14, Distinguished Professor, or Academic Department Head). ***Typical Duties/Responsibilities***: One or both of the following: •In a ***supervisory capacity***, is responsible for (a) an important segment of the engineering program of an organization with extensive and diversified engineering requirements, ***or*** (b) the entire engineering program of an organization when it is more limited in scope. The overall engineering program contains critical problems, the solution of which requires major technological advances and opens the way for extensive related development. The extent of responsibilities generally requires several subordinate organizational segments or teams. Recommends facilities, personnel, and funds required to carry out programs which are directly related to and directed toward fulfillment of overall organization objectives. •As an ***individual researcher or consultant***, is a recognized leader and authority in the organization in a broad area of specialization or in a narrow but intensely specialized field. Selects research problems to further the organization's objectives. Conceives and plans investigations of broad areas of considerable novelty and importance for which engineering precedents are lacking in areas critical to the overall engineering program. Is consulted extensively by associates and others, with a high degree of reliance placed on ensuing scientific interpretations and advice. Typically will have contributed inventions, new designs, or techniques which are regarded as major advances in the field. ***Direction Received***: Supervision received is essentially administrative, with assignments given in terms of broad general objectives and limits. ***Supervisory Responsibility***: Directs several subordinate supervisors or team leaders, some of whom are in positions comparable to Engineer VI ***or***, as an ***individual researcher or consultant***, may be assisted on individual projects by other engineers and technicians.

[8] ENGINEER VIII (equivalent to GS 15 or Academic Department Head/Dean). ***Typical Duties/Responsibilities***: One or both of the following: •In a ***supervisory capacity***, is responsible for ***(a)*** an important segment of a very extensive and highly diversified engineering program or ***(b)*** the entire engineering program when the program is of moderate scope. The programs are of such complexity that they are of critical importance to overall objectives, include problems of extraordinary difficulty that often have resisted solution, and consist of several segments requiring subordinate supervisors. Is responsible for scientific approaches, for planning and organizing facilities and programs, and for interpreting results. •As an ***individual researcher or consultant***, formulates and guides the attack on problems of exceptional difficulty and marked importance to the organization or industry. Problems are characterized by their lack of scientific precedents and source material, or lack of success of prior research and analysis so that their solution would represent an advance of great significance and importance. Performs advisory and consulting work for the organization as a recognized authority for broad program areas or in an intensely specialized area of considerable novelty and importance. ***Direction Received***: Receives general administrative direction. ***Supervisory Responsibility***: Supervises several subordinate supervisors or team leaders, some of whose positions are comparable to Engineer VII, or individual researchers, some of whose positions are comparable to Engineer VII, and sometimes Engineer VIII. As an ***individual researcher or consultant***, may be assisted on individual projects by other engineers or technicians.

[9] ENGINEER IX (equivalent to SES, GS 16 - 18, or Academic Dean). ***Typical Duties/Responsibilities***: An engineer at this level is either: ***•in charge of programs*** so extensive and complex as to require staff and resources of sizeable magnitude (e.g., research and development, a department of government responsible for extensive engineering programs, or the major component of an organization responsible for the engineering required to meet the objectives of the organization); ***or*** •an ***individual researcher or consultant*** who is recognized as a national and/or international authority and leader in an area of engineering or scientific interest and investigation.

F. ***Length of Experience.*** In the ***two*** boxes under ***F*** on the Survey Reply Form, post the ***total*** number of years of professional experience you have had in the engineering field, including ***related*** managerial experience. NOTE: If ***less than*** one year, post ***two*** zeros; if one - ***ten*** years, precede with ***one*** zero.

G. ***Highest Degree Earned.*** (Please ***exclude*** honorary degrees.)

- 1 1 ***Less than*** a B.A./B.S. Degree.
- 1 2 B.A. Degree.
- 1 3 B.S. Degree (non-engineering).
- 1 4 B.S. Degree (engineering).
- 1 5 M.A./M.S. Degree (***not*** M.B.A. or engrg.).
- 1 6 M.B.A. Degree.
- 1 7 M.S. Degree (engineering).
- 1 8 M.B.A. ***and*** an M.A. or M.S. Degree.
- 1 9 Doctorate (non-engineering).
- 2 0 Doctorate (engineering).
- 2 1 Other (***not*** adequately described above).

H. ***Major Branch of Engineering.*** In the ***two*** boxes under ***H*** on the Survey Reply Form, post the ***code number*** which identifies your ***major*** branch of engineering work (as of January 1, 1990).

- 1 1 Aeronautical & Aerospace.
- 1 2 Agricultural.
- 1 3 Architectural.
- 1 4 Chemical.
- 1 5 Civil (general).
- 1 6 Civil (***primarily*** structural).
- 1 7 Civil (***primarily*** surveying).
- 1 8 Cost/Value.
- 1 9 Electrical & Electronics.
- 2 0 Industrial.
- 2 1 Manufacturing.
- 2 2 Mechanical.
- 2 3 Metallurgical & Materials.
- 2 4 Mining.
- 2 5 Nuclear.
- 2 6 Petroleum.
- 2 7 Safety.
- 2 8 Sanitary, Environmental & Pollution Control.
- 2 9 ***Other*** or a ***combination*** of branches.

I. ***Job Function.*** Which ***one*** of the following ***best*** describes your job function on January 1, 1990?

- 1 Construction Supervision (may include ***some*** design).
- 2 Design.
- 3 Executive/Administrative.
- 4 Production/Quality Control/Maintenance/etc.
- 5 Project Study & Analysis.
- 6 Research & Development.
- 7 Sales/Marketing.
- 8 Teaching/Training.
- 9 ***Other*** (***not*** adequately described above).

J. ***Number of Engineers.*** Under J on the Survey Reply Form, post the ***total*** number of engineers (***B.S. or higher***) in your ***entire*** company or other employing organization. (If only yourself, post ***001***. If 2-10, ***precede*** with ***two*** zeros. If 10 - 99, ***precede*** with ***one*** zero. If 998 or more, post ***998***.)

K. ***Type of Supervisory Responsibility.*** Under K, post the code number for the statement below which ***best*** describes your supervisory status on January 1, 1990.

- 1 I had no ***consistent*** supervisory responsibility (staff engineer or specialist, consultant, etc.).
- 2 I supervised ***engineers***, ***scientists*** and/or ***technologists*** (without ***significant*** involvement in directing the activities of clerical, construction, maintenance, or production employees).
- 3 I supervised ***clerical***, ***construction***, ***maintenance***, and/or ***production*** employees (without ***significant*** involvement in directing the activities of engineers, scientists, and/or technologists).
- 4 I supervised the types of employees described in ***both*** 2 and 3 above about equally.
- 5 Other (***not*** adequately described above).

L. ***Level of Supervisory Responsibility.*** Under L on the Survey Reply Form, post the ***number*** of employees you supervised or (through subordinate supervisors) directed (***of the type which you specified for Question K***) on January 1, 1990. (If ***none***, post ***three*** zeros. If 1 - 9, ***precede*** with ***two*** zeros. If 10 - 99, ***precede*** with ***one*** zero. If 998 or more, post ***998***.)

M. ***Industry or Service of Employer.*** In the ***two*** boxes under M on the Survey Reply Form, post the code number of the ***one*** response which ***best*** describes the industry or service of your ***employer***.

Manufacturing/Extractive Employers

- 1 1 Aerospace/Aircraft Products.
- 1 2 Chemical, Pharmaceutical & Allied Products (***excluding*** 13, 18, 20 & 21 below).
- 1 3 Coal Products.
- 1 4 Electrical & Electronics ***Equipment***.
- 1 5 Fabricated Metal Products.
- 1 6 Food/Beverage/Tobacco Products.
- 1 7 Machinery (***except*** electrical).
- 1 8 Petroleum/Natural Gas Products.
- 1 9 Primary Metal Industries.
- 2 0 Rubber/Plastic Products.
- 2 1 Stone/Clay/Glass/Concrete Products.
- 2 2 Transportation ***Equipment*** (***excluding*** 11 above) (automotive, farm, marine & railroad equipment, parts & accessories).
- 2 3 ***Other*** Manufacturing/Extractive employers (***not*** listed above).

Non-Manufacturing/Non-Extractive Employers

- 3 1 Colleges & Universities.
- 3 2 Communication ***Services*** (radio/TV/telephone/telegraph/etc.).
- 3 3 Construction & Real Estate Development.
- 3 4 Government - Federal (***including*** Armed Forces).
- 3 5 Government - State.
- 3 6 Government - Local (cities, counties, etc.).
- 3 7 Private Practice - Chemical.
- 3 8 Private Practice - Civil/Structural.
- 3 9 Private Practice - Electrical.
- 4 0 Private Practice - Electronics.
- 4 1 Private Practice - Mechanical.
- 4 2 Private Practice - Other or a combination of two or more fields.
- 4 3 Research Organizations & Laboratories (***excluding*** 31 and 34 above).
- 4 4 Transportation ***Services*** (air, railroad, trucking, water, warehousing).
- 4 5 Utilities - Electric.
- 4 6 Utilities - Gas.
- 4 7 Utilities - Pipelines.
- 4 8 Utilities - Other or Mixed.
- 4 9 ***Other*** Non-Mfg. employers (***not*** listed above).

N. ***State.*** In the ***two*** boxes under N on the Survey Reply Form, post the ***code number*** for the state in which you spend the greatest part of your applied working effort (or, if you travel extensively, in which your office is located).

Region 1

- 1 1 Connecticut
- 1 2 Delaware
- 1 3 Dist. of Columbia

P. ***Registration Status.***

- 1 Professional Engineer (P.E.) ***and*** Registered Land Surveyor (L.S.).
- 2 Professional Engineer (P.E.) ***and*** some ***other*** professional registration (RA, MD, CPA, Bar, etc.).
- 3 Professional Engineer (P.E.) ***and*** certification in Environmental Engineering.
- 4 Professional Engineer (P.E.) ***and*** certification in Forensic Engineering.
- 5 Professional Engineer (P.E.) ***and*** certification in some ***other*** engineering specialty (Safety, Fire Protection, etc.).
- 6 Professional Engineer (P.E.).
- 7 Engineer-in-Training/Engineer Intern.
- 8 ***No*** professional registration or certification.
- 9 Other (***not*** adequately described above).

Q. ***Origin of Respondent.*** (E.E.O. Classifications.)

- 1 White (not of Hispanic origin).
- 2 Black.
- 3 Hispanic.
- 4 Asian or Pacific Islander.
- 5 American Indian or Alaskan Native.
- 6 Other (***not*** adequately described above).
- 7 I prefer not to answer this question.

R. ***Change in Base Salary in 1989.*** Regarding your ***base*** salary during 1989, post in the *two* boxes under R on your Survey Reply Card the ***first*** code number which appears below which ***applies to you.***

- 11 ***Not*** applicable (self-employed/unemployed/retired/student).
- 12 ***Promoted*** during 1989.
- 13 ***Changed employers*** during 1989.
- 14 Salary ***decreased*** during 1989.
- 15 ***No change*** during 1989.
- 16 Increased ***less than 3%.***
- 17 Increased 3 - 4.9%.
- 18 Increased 5 - 6.9%.
- 19 Increased 7 - 8.9%.
- 20 Increased 9 - 10.9%.
- 21 Increased 11 - 12.9%.
- 22 Increased 13 - 14.9%.
- 23 Increased 15 - 16.9%.
- 24 Increased 17% or more.

S. ***Overtime Compensation.*** How are you ***normally*** compensated for ***overtime*** work?

- 0 ***Not applicable*** (I ***never*** work overtime or am self-employed/unemployed/retired/student).
- 1 ***No*** direct compensation.
- 2 Paid a fixed rate ***lower*** than straight time pay.
- 3 Paid ***straight time*** for overtime.
- 4 Given ***equal time*** off.
- 5 Paid straight time, plus a premium of ***under*** 50%.
- 6 Paid for ***time and one-half.***
- 7 Other (***not*** adequately described above).

T. ***401(k) PLANS.*** Does your employer provide a 401(k) plan?

1 Yes. 2 No. 3 I don't know.

U. ***Employer Matching.*** Some employers contribute a ***percentage*** of an employee's ***personal*** contribution to a 401(k) plan. What percentage of your contribution does your employer match?

- 0 ***Not applicable*** [no 401(k) plan or self-employed/unemployed/retired/student].
- 1 I don't know.
- 2 Employer's contribution ***not*** tied to mine.
- 3 ***Under*** 25%.
- 4 25% - 49%.
- 5 50%.
- 6 51% - 75%.
- 7 76% - 99%.
- 8 100%.

V. ***Fixed Percentage of Salary Contributed by Employer to 401(K) Plan.*** If your employer's ***maximum*** contribution to your 401(k) plan is a ***fixed percentage*** of your salary, what is the ***maximum*** percentage of your salary will your employer contribute?

- 0 ***Not applicable*** [no 401(k) plan or self-employed/unemployed/retired/student].
- 1 I don't know.
- 2 Employer has a 401(k) plan but does ***not*** contribute to it.
- 3 ***Under*** 2%.
- 4 2.0% - 3.9%.
- 5 4.0% - 5.9%.
- 6 6.0% - 7.9%.
- 7 8.0% - 9.9%.
- 8 10% ***or more.***

"I have recommended that a copy of ***Engineer Your Way to Success*** *be given to all engineers in our company who have less than five years' experience."*

Listen to what young engineers are saying about *Engineer Your Way to Success*

"Good, solid advice to anyone planning an engineering career!"

"Well written . . . great guidance ideas."

"Easy to read and straightforward. The 'measures' section at the end of each chapter helps me compare my career progress."

Engineer Your Way to Success answers important questions about your career in engineering:

- Is the management route the only way to become successful in engineering?
- Should you specialize in a narrow field or get a wide range of experience?
- Why is teamwork such a vital part of engineering success?
- What are the components of "good judgment"?

Buy a copy for your review or copies for all your engineers. **Engineer Your Way to Success** is an appropriate office gift for recognition, promotion or a welcome aboard gift for a new staff member. Additional discounts are available on orders of 10 or more.

Constant Improvement:

Improving the Quality of Engineering Management

Discover how *Dr. W. Edwards Deming's* Total Quality Management (TQM) principles are being used to improve the quality of engineering in Private Practice, Industry, Construction, Education and Government.

Constant Improvement: Improving the Quality of Engineering Management is a panel discussion on Total Quality Management (TQM) conducted by NSPE's Practice Divisions and the National Institute for Engineering Management and Systems (NIEMS).

This set of two audio cassettes and one workbook will give you the latest information on implementing TQM techniques and principles in all areas of engineering.

You will learn:

- how vertical organization structures kill quality
- the concept of internal customers
- statistical planning and management tools
- how flow charts reveal quality problems

All proceeds of **Constant Improvement: Improving the Quality of Engineering Management** go to furthering NSPE and NIEM's efforts to introduce Dr. W. Edwards Deming's TQM principles to all segments of engineering.

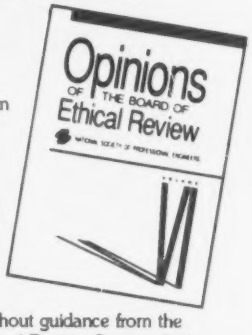
Facing An Ethical Dilemma?



As an engineer, ethics in practice is one of the most pressing and complicated issues facing you today. You don't have to face it alone! You can profit from the collective knowledge of the Board of Ethical Review (BER) by consulting the case studies again and again with your ethical questions.

Look to the NSPE BER for insightful expert advice. Find detailed analyses of the 50 most recent ethical situations brought to the Board for judgement in this 120-page volume of the BER.

Don't face tough ethical decisions without guidance from the experts—order the NSPE Board of Ethical Review Cases today!

Engineering Ethics

Examine an explosive true-to-life engineering ethics situation in **Gilbane Gold!** This video tape will help you and your engineers manage the complex ethical issues you face.

This ethics case study focuses on a major manufacturer in the city of Gilbane that has been discharging dangerous chemicals into the city's sewer system. The problem? The city uses its sewage to produce "Gilbane Gold," a commercial fertilizer sold to farmers.

The engineer in charge of waste treatment for the manufacturer is caught between the obvious threat to public health, city attorneys threatening legal action and his responsibility to his company and the community.

Through the engineer's struggle with his dilemma, important ethical concepts are illustrated which can be directly applied to the issues you and your engineers face on a daily basis.
